Lab 14 : Create a quiz application that displays one question at a time. Track the user's score and show the final result at the end.

TAGS / CSS USED	ATTRIBUTES / VALUES USED	DESCRIPTION
<!DOCTYPE html>	html	Defines an HTML5 document.
<html>	lang="en"	Root element of the webpage.
<head>	—	Contains title, CSS, and metadata.
<meta>	charset, viewport	Defines character encoding and responsive display.
<title>	Simple Quiz Application	Sets the browser tab title.
<style>	CSS rules	Adds internal CSS styling.
<body>	—	Contains the visible webpage content.
<header>	—	Creates the quiz header.
<h1>, <h2>	id="question"	Displays the quiz title and questions.
	class="quiz-box", id="options"	Creates the quiz container and options section.
<p>	id="number", id="result"	Displays question number and final score.
<button>	onclick, id	Creates Next and Restart buttons.
<label>	class="option"	Displays each answer option.
<input>	type="radio", name="answer"	Allows users to select one answer.
	id="option0" etc.	Displays the answer option text.
<script>	JavaScript code	Contains quiz logic and functions.
.quiz-box	max-width, padding, margin	Styles and centers the quiz container.
.option	display: block, cursor: pointer	Styles clickable answer options.
border-radius	5px, 10px	Creates rounded corners.

box-shadow	0 2px 8px	Adds a shadow around the quiz box.
text-align	center, left	Aligns text inside elements.
button:hover	opacity: 0.85	Adds a hover effect to buttons.
var	questions, current, score	Declares JavaScript variables.
questions = []	Array of objects	Stores questions, options, and correct answers.
function showQuestion()	—	Displays the current question and options.
function nextQuestion()	—	Checks the answer and moves to the next question.
function restartQuiz()	—	Resets the quiz and score.
document.getElementById()	Element ID	Accesses HTML elements using their IDs.
document.querySelector()	input[name="answer"]:checked	Finds the selected radio button.
innerHTML, textContent	HTML / Text	Updates questions, options, and results dynamically.
for	i = 0; i < 4; i++	Loops through the four answer options.
if...else	Conditions	Checks answers and controls quiz flow.
Number()	selected.value	Converts the selected answer value into a number.
score++, current++	Increment operator	Increases the score or question number.
alert()	Message	Displays a popup when no answer is selected.
style.display	none, inline-block	Hides or displays buttons.
return	—	Stops execution when no answer is selected.

Final Outcome:

Code Snipet :

```
<!DOCTYPE html>
<html lang="en">

<head>
 <meta charset="UTF-8">
 <meta name="viewport" content="width=device-width, initial-scale=1.0">
